The Postbox Game

Basic rules, call post boxes out if you get them right your score is increased by the appropriate number of points. In the event that you get it wrong your score is reduced by half the points.

Points are reset daily.

Elizabeth II— 2 points

George V or George VI—4 Points

(currently no distinction between the two)

Victoria— 7 points

Edward VII—9

Edward VIII—12 points

(although this may be too low given that there are only forty or so of these)

Other Rules

Octagonal or hexagonal postboxes get a bonus point for each side.

A decommissioned post box grants a 3x score multiplier (therefore a decommissioned ER would give a score of six, a VR would be 32 points, etc).

Additional points for coloured boxes—but we haven't ironed out the particulars.

Points for Vans

6 Points

8 Points

10 Points

12 Points

Points for Posties

In all cases a bonus 20 points if you can get a picture of yourself interacting with the postie.
50 bonus points if you shout “postie” and make them shit themselves.

Postman 6

This ridiculous thing—8 points

Postie On a Bike — 12

(no extra points for adverse weather conditions—its their job)

Bike on its own—6 points

Whatever the hell this thing is—8 points

Postie Unloading a Van—8

(plus points for Van based on size).

Postie emptying a post box —8

(plus points for post box based on Monarch, but if you get it wrong you also lose half the postie points).
